- Backend: Node.js, Express.js, MongoDB, JWT Authentication
- UI/UX: Responsive Web Design, DaisyUI, SASS, Figma (Basic)
- Tools & Platforms: Git, GitHub, Vercel, Netlify, Cloudinary
- Basic: php, laravel, Next.js

Projects

1. Noukori Gulf

Developed a responsive Employee Management System where employees can track their workload, HR can manage payroll, and admins have complete control over employee actions. Key features include

Technologies: React.js, context API, Node.js, MongoDB, and Firebase for backend services

- User Authentication: Email/password-based login and registration with roles (Employee, HR, Admin) and social login (Google)
- Employee Dashboard: Employees can submit work records with a form and table display, edit or delete entries
- HR Dashboard: HR can view employee data, toggle verification status, and manage payroll.
- Admin Dashboard: Admin can view and manage all employees, adjust salaries, make employees HR, and approve payroll.
- Payment Gateway and JWT Authentication Used for role-based access to routes.
